E. SESSION SUMMARY:

Target is an interface between two types of land, with a structure.

One type of land is light colored and brightly lit. This area feels like soft ground, perhaps sand.

The other type of land is dark, "chunky", and has sharp edges in profusion. (AOL: Lava or gravel field) This may be a foothill area leading to mountains in the distance.

The structure is wide, low (1 story), and is very solidly built in a "boxy" style. It appears to be relatively empty, except for one or two people who are bored, and appear to be biding time. One of these people is an elderly man.
